## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 6, 26-36, and 50 are allowed.

The following is an examiner's statement of reasons for allowance for all claims:

The most relevant prior art of record, the Dymetman reference, fails to disclose receiving a position coding pattern, determining at least one absolute position by determining displacements of center of gravity marks from nominal positions in the position coding pattern, identifying an instruction on the basis of the absolute position, and carrying out the instruction over a network using person-specific information previously stored in the system.

Updated searches revealed no references that disclosed the claimed inventions, nor were any secondary references identified which could be reasonably combined with Dymetman.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The article entitled "United Airlines Automates In-Flight Shopping with Mobile Handhelds Based on PenRight!" is cited for its disclosure of scanner-based payment and ordering of goods and services using a pen-like device.

The Ogasawara reference is cited for its disclosure of a mobile device used to scan item information and to facilitate purchase.
